

MetroPlus Health Plan Quick Reference Guide

The **MetroPlus Health Plan Quick Reference Guide** is not an all-inclusive list but represents a summary of prescribed medications within select therapeutic categories. This useful reference tool can assist medical providers in selecting therapeutically appropriate and cost-effective products for their patients.

This list represents brand products in CAPS, branded generics in upper- and lowercase *Italics*, and generic products in lowercase *italics*. This document is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.

This list is not all-inclusive and does not guarantee coverage. Please visit <https://www.metroplus.org/member-services/formularies> for a complete list.

For prior authorization, please call 1-877-433-7643.

FOR YOUR INFORMATION: This drug list represents a summary of prescription coverage. It is not all-inclusive and does not guarantee coverage. In most instances, a brand-name drug for which a generic product becomes available will require prior authorization or will no longer be covered upon release of the generic product to the market. Unless specifically indicated, drug list products will include all dosage forms. This list represents brand products in CAPS, branded generics in upper- and lowercase *Italics*, and generic products in lowercase *italics*. Listed products may be available generically in certain strengths or dosage forms. Dosage forms on this list will be consistent with the category and use where listed. Log in to <https://www.metroplus.org/member-services/formularies> to check coverage.

An exception process may exist for specific clinical or regulatory circumstances that require coverage of a removed medication.

§ Generics are available in this class and should be considered the first line of prescribing.

¹ The quantity of opioid products covered (including those that are combined with acetaminophen, aspirin, or ibuprofen) will be limited to up to 90 morphine milligram equivalents (MMEs) per day based on a 30-day supply. Members may be subject to additional quantity limit restrictions, including a first-fill limit of 7 days (for members who are opioid-naive) and 90 days of treatment per 365 days.

This document contains references to brand-name prescription drugs that are trademarks or registered trademarks of pharmaceutical manufacturers. Listed products are for informational purposes only and are not intended to replace the clinical judgment of the prescriber.

The information contained in this document is proprietary. The information may not be copied in whole or in part without written permission.
